A Home Away from Home

Designer **Lynne Scalo** delivers a busy couple the bedroom of their dreams.

THE CLIENT I DESIGNED THIS ROOM FOR has a large family—including extended members—and the priority for this master bedroom was to provide a dreamy, romantic respite for her and her husband. I wanted to create an opportunity for romance amid the bustle of the season and away from their city life.

The house itself is not your typical Hamptons shingle-style home, nor is it modern. It's a Mediterranean-style house on the ocean, and we wanted to keep the European elements evident. The choice of artwork and the color palette as well as the natural light throughout the home reflect these, while also honoring the building's style and the view to sea.

The furniture and accessories also follow that theme. There's a

19th-century French chandelier, bought at a Paris flea market; a custom Italian iron bed finished in an old-world patina; an ash-wood Capistrano end; a Merida Meridian sea-grass rug with a Mongolian fur rug lying on it; shades by Conrad and Raffia; and an iron chair covered in Rogo & Goffigon basket-weave linen. The walls were painted Benjamin Moore White Dove; the artwork is *Lines Drawing* by Robert Kelly and *Florals/Botanicals* by Noelle Franco, and both are framed in mirrored Trowbridge frames.

I love this room because it feels exactly like a home in the Hamptons should: an escape from the ordinary that truly gives you the feeling that you're somewhere special. lynnescalo.com
